Summary

Computer Engineering student focused on Full-Stack Software Development. Former Full-Stack Development Intern with experience in developing and maintaining web applications, working across both front-end and back-end using technologies such as React and Django, while collaborating with the development team to implement new features and improve existing systems. Strong background in Python for Computer Vision and Artificial Intelligence through the MAIA FACENS research group, as well as firmware development in C/C++ for microcontrollers and sensor integration as a member of the V8 Racing Formula SAE team. Proficient in modern web technologies, including React.js, Node.js, Java, JavaScript, HTML, and CSS. Continuously expanding my technical skills and seeking opportunities in Software Development to apply my analytical thinking while learning new technologies throughout the entire software development lifecycle.

Technical Skills

Front-end: React.js, Express.js, JavaScript, HTML, CSS, Bootstrap.

Back-end: Python (Django), JavaScript, Node.js.

Databases: PostgreSQL, SQL (Microsoft SQL Server).

Low-level Languages: C, C++.

Extras: GitHub, Notion, Trello, 3ds Max, Blender, Docker, Linux.

Languages

English: Professional Working Proficiency | **Portuguese:** Native | **Japanese:** Basic

Experience

T4E Group

Mar. 2026 – May 2026

Web Development Intern

Sorocaba, SP

- Building and maintaining responsive web interfaces using HTML, CSS, and JavaScript.
- Using Git/GitHub for collaborative version control.
- Bug fixing, code refactoring, and writing technical documentation.
- Focusing on Clean Code practices and meeting delivery deadlines.
- **Technologies:** React, Node, Express, CSS, HTML, JavaScript, Git, GitHub, Django, Python

Huawei Brasil

Jan. 2026 – Mar. 2026

Logistics Intern

Sorocaba, SP

- Analyzed data in Excel and developed VBA automations to identify operational flaws and optimize logistics process efficiency.
- Manipulated data using SQL to generate reports, dashboards, and operational insights.
- Collaborated within a multidisciplinary team to ensure projects were delivered within established deadlines.
- **Technologies:** Excel, VBA, SQL.

MAIA Facens - Facens

Jun. 2024 – Sep. 2025

Collaborator

Sorocaba, SP

- Developed solutions for an autonomous vehicle on the DonkeyCar platform, focusing on computer vision and autonomous driving.
- Trained and validated models using Python in a virtual environment managed with Miniconda.
- Executed and tested software in a Linux environment (dual boot), ensuring system compatibility and optimal performance.
- **Technologies:** Python, C++, DonkeyCar, Linux, Miniconda, Git.

Projects

Aquatic Waste Collector Robot

2024

Academic Project

- Designed and developed the physical model of an autonomous robot to collect floating debris in rivers, with a focus on sustainability and pollution reduction.
- Implemented an embedded system with ESP32, Bluetooth communication, and a mobile application developed in MIT App Inventor 2 for remote control and monitoring.
- Integrated sensors (gyroscope, barometer, temperature, and humidity) for real-time environmental data collection and transmission, applying IoT concepts.
- Developed the mechanical structure using 3D modeling and ABS 3D printing, applying buoyancy and technical sizing principles.
- **Technologies:** ESP32, C/C++, Bluetooth, IoT, Embedded Sensors, 3D Modeling, 3D Printing.

AI README Generator

- Developed a web application that automatically generates professional GitHub README files from repository information using Retrieval-Augmented Generation (RAG).
- Implemented document retrieval, prompt engineering, and Large Language Models (LLMs) to generate customized project documentation based on user-provided content.
- Designed a responsive and intuitive interface, allowing users to preview, edit, and export generated README files in Markdown format.
- **Technologies:** React, TypeScript, Node.js, Express.js, RAG, LLMs, AI, Markdown, GitHub API.

Personal Portfolio Website

- Designed and developed a responsive personal portfolio website to showcase projects, technical skills, and professional experience.
- Created a clean and intuitive interface with smooth navigation, focusing on usability and responsive design for different screen sizes.
- Applied semantic HTML and modern CSS techniques to build a visually appealing and accessible website.
- **Technologies:** HTML5, CSS3, JavaScript, GitHub Pages.

Education

Centro Universitário FACENS

Feb. 2024 – Present

Bachelor's Degree in Computer Engineering

Sorocaba, SP

- **Core Coursework:** Data Structures and Algorithms, Differential and Integral Calculus, Databases, Operating Systems, Computer Architecture, Electrical Circuits, Embedded Systems, and Artificial Intelligence.

Courses and Certifications

- Artificial Intelligence Course FACENS (Jan. 2026)
- Full Stack Development (HTML, CSS, Flexbox, Grid, JavaScript, Node.js, TypeScript, React, Tailwind, Next.js, MySQL, MongoDB, Docker, Git, APIs, and Prisma) Udemy (Jan. 2026)
- Web Development Udemy (Sep. 2024)
- IP Network Projects FACENS (Sep. 2024)
- Excel and Power BI Intermediate Level (Apr. 2025)

Honors and Awards

- Honorable Mention OBMEP (Brazilian Public Schools Mathematics Olympiad) Dec. 2022
